

1<sup>st</sup> February 2011

To Whom It May Concern:

This is to confirm that pursuant to our Purchase Order, M/s Ecopower Pvt. Ltd., Mumbai have installed one 'Smartcool' energy saving device to our 2 Kirloskar McQuay (448 kW each) centrifugal central chiller plants at our Prestige Tech Park, Bangalore on 3<sup>rd</sup> January 2011.

Energy consumption recorded on a dedicated energy meter, since installation indicates an average power saving of 13% being achieved to date under varying compressor loading conditions corresponding to climatic variations.

We were initially promised a 10% savings by Ecopower and are extremely happy to see that this product is delivering more than the promised savings. We are satisfied with the company's sales and post installation service. We are interested in taking up further installations at our other commercial sites, hotels and malls.

As requested we have attached the savings report to this testimonial.
